

Akershus universitetssykehus HF

Søker	Søknadstype	Prosjekttittel	Oppstartsdato	Varighet	Beløp for 2024
Andreas Lossius	Doktorgradsstipend	Back to the B-ginning: The source of pathogenic B cells in MS	01.01.2024	3 år/100 %	1 294 000
Georg Mathias Honoré Barra	Doktorgradsstipend	Clinical priority setting (ClinPri) – Health care professionals' views on constraints and opportunities for priority setting.	01.01.2024	3 år/100 %	1 294 000
Henrik Schirmer	Doktorgradsstipend	Artificial Intelligence Guided Detection of Acute Coronary Occlusions in Prehospital Acute Electrocardiograms	01.01.2024	6 år/50 %	647 000
Jurate Saltyte Benth	Doktorgradsstipend	Lessons from the pandemic: Developing a tool for monitoring hospital capacity during public health crises (HosPrepTool)	01.01.2024	3 år/100 %	1 294 000
Kirsten Midttun Gravningen	Doktorgradsstipend	Improving antibiotic stewardship in hospitals using electronic records, individual feedback to prescribers, and assessing environmental risk of antibiotics in wastewater	01.01.2024	3 år/100 %	1 294 000
Marijke Veenstra	Doktorgradsstipend	Towards improved integrated healthcare for frail elderly with complex care needs in Norway (IHC-research)	01.01.2024	6 år/50 %	647 000
Svend Ulstein	Doktorgradsstipend	Predictors for treatment failure, the cost effectiveness and reasons for compensation claims following acute Achilles' tendon ruptures	01.01.2024	6 år/50 %	647 000
Guro Pauck Bernhardsen	Postdoktorstipend	Sex-specific metabolic characterization of depressive phenotypes – is physical activity a potential interventional target (PHENOTARGET)?	01.01.2024	3 år/100 %	1 294 000
Peder Langeland Myhre	Postdoktorstipend	Underuse of lifesaving heart failure treatment in Norway – regional disparities, access to care and underlying causes	01.01.2024	3 år/100 %	1 294 000
Ingeborg Skjærvø	Åpen prosjektstøtte	Substance use disorder treatment: the role of comorbid chronic pain and post-traumatic stress in maintaining substance use	01.01.2024	3 år/100 %	1 987 000
Julia Menichetti Delor	Åpen prosjektstøtte	Building patient HEAlth Literacy during medical INTERactions	01.08.2024	3 år/100 %	971 000
Magnus Nakrem Lyngbakken	Åpen prosjektstøtte	Antibiotic therapy in viral airway infections (ATHENIAN): Efficacy and safety of discontinuing antibiotic therapy in adult patients infected with respiratory viruses	01.01.2024	3 år/100 %	2 983 000
Torbjørn Omland	Åpen prosjektstøtte	Cardiomodulatory effects of gender-affirming hormone therapy	01.01.2024	3 år/100 %	2 999 000

Oslo universitetssykehus HF

Søker	Søknadstype	Prosjekttittel	Oppstartsdato	Varighet	Beløp for 2024
Anne Lee Solevåg	Doktorgradsstipend	Epi-FOMO – Epidural analgesia and Fetal Oxygenation and Maternal Oxygenation	01.01.2024	3 år/100 %	1 294 000
Daniel Dahlberg	Doktorgradsstipend	Advancement in Endoscopic Endonasal surgery for pituitary neuroendocrine tumors (PitNET): Improving patient outcome and tumour cure	01.01.2024	3 år/100 %	1 294 000
Deo Prakash Pandey	Doktorgradsstipend	Preclinical validation of transcriptional cyclin-dependent kinases, CDK12/CDK13 as potential therapeutic targets to treat glioblastoma	01.01.2024	3 år/100 %	1 294 000
Einar August Høgestøl	Doktorgradsstipend	AIMS - Advanced Image Processing to Improve Multiple Sclerosis Treatment	01.01.2024	3 år/100 %	1 294 000
Elfrida Hartveit Kvarstein	Doktorgradsstipend	Clinical Utility of Personality Disorder Treatment (The TREATPD Study)	01.01.2024	3 år/100 %	1 294 000
Espen Ajo Arnevik	Doktorgradsstipend	Quality improvement in detoxification treatment services: Repeated admissions, treatment completion and transition to substance use disorder treatment	01.01.2024	3 år/100 %	1 294 000
Fahri Saatcioglu	Doktorgradsstipend	Identification of a novel biomarker and therapeutic target for prostate cancer	01.01.2024	3 år/100 %	1 294 000
Gro Owren Nygaard	Doktorgradsstipend	IMPROVE MS: Improved long-term treatment of multiple sclerosis: safety and efficacy after five years in persons randomized to oral cladribine or rituximab	01.01.2024	6 år/50 %	647 000
Hanna Dis Margeirsdottir	Doktorgradsstipend	Atherosclerosis in Childhood Diabetes: 15-year follow-up Study	01.01.2024	3 år/100 %	1 294 000
Inga Hansine Rye	Doktorgradsstipend	Tumor-Microenvironment Dynamics during Progression in Luminal B Breast Carcinomas	01.07.2024	3 år/100 %	647 000
Jan Ivar Røssberg	Doktorgradsstipend	RecoVRy- A randomized Controlled Trial examining the effect of Artificial Intelligence powered Virtual Reality Treatment in Psychosis	01.01.2024	3 år/100 %	1 294 000
Janne Anita Kvammen	Doktorgradsstipend	Celiac disease and quality of life in children and adolescents (CeliaQLife)	01.01.2024	3 år/100 %	1 294 000
Kristin Stedal	Doktorgradsstipend	Effectiveness of Temperament Based Therapy with Support (TBT-S): A Novel 5-day Treatment for Anorexia Nervosa	01.01.2024	3 år/100 %	1 294 000
Kushtrim Kryeziu	Doktorgradsstipend	Unleashing the potential of PARP inhibitors against colorectal cancer	01.01.2024	3 år/100 %	1 294 000
Lasse Pihlstrøm	Doktorgradsstipend	NAD-HD: A randomized clinical trial of nicotinamide riboside in Huntington's disease	01.01.2024	3 år/100 %	1 294 000
Mathias Toft	Doktorgradsstipend	Plasma biomarkers for dementia risk in mild cognitive impairment – the AI-Mind innovation study	01.01.2024	3 år/100 %	1 294 000

Oslo universitetssykehus HF

Søker	Søknadstype	Prosjekttittel	Oppstartsdato	Varighet	Beløp for 2024
Nils Tore Vethe	Doktorgradsstipend	Targeting adherence and muscle side effects with a novel pharmacological method to improve lipid management in patients with familial hypercholesterolemia	01.01.2024	3 år/100 %	1 294 000
Nina Haagenrud Schultz	Doktorgradsstipend	The study of Anticoagulation with Dabigatran etexilate in patients with Venous vascular Anomalies – the DAVA study	01.01.2024	6 år/50 %	647 000
Reza Ghiasvand	Doktorgradsstipend	Risk Assessment and Personalized Surveillance Strategies for Melanoma Patients	01.01.2024	3 år/100 %	1 294 000
Rune Enger	Doktorgradsstipend	Targeting vasomotion to improve brain waste clearance in sleep	01.01.2024	3 år/100 %	1 294 000
Suraj Thapa	Doktorgradsstipend	Mental health and healthcare service use—a longitudinal, registry-based, cohort study of refugees from Syria resettled in Norway between 2015 and 2017	01.01.2024	3 år/100 %	1 294 000
Tor Henrik Anderson Tvedt	Doktorgradsstipend	Liquid Array Diagnostics for rapid diagnostics in acute myeloid leukemia	01.01.2024	3 år/100 %	1 294 000
Viktor Berge	Doktorgradsstipend	Preoperative PSMA PET/CT as triage for extended pelvic lymph node dissection in prostate cancer patients	01.01.2024	6 år/50 %	647 000
Wibeke Nordhøy	Doktorgradsstipend	Improved visualization and detection of chronic active lesions with quantitative susceptibility mapping – IMPROVED-MS	01.01.2024	3 år/100 %	1 294 000
Xiaojun Jiang	Doktorgradsstipend	Spatial multi-Omics building FuncTional hierarchy for disease genes in inflamed bile ducts	01.01.2024	3 år/100 %	1 294 000
Astrid Kristine Bjørnebekk	Postdoktorstipend	GenSUD: Unlocking Genetic and Trajectory Insights into Substance Use Disorders through Extensive Biobank Sampling	01.12.2024	3 år/100 %	110 000
Caroline Stokke	Postdoktorstipend	FLUCIPET; improving diagnostics of multiple myeloma to allow early treatment and increase survival	01.01.2024	3 år/100 %	1 294 000
Christoffer Hatlestad-Hall	Postdoktorstipend	MCI:3-net: Risk assessment of dementia using EEG and network science - functional brain connectivity, patient similarity networks, and deep learning approaches	01.01.2024	3 år/100 %	1 294 000
Corina Silvia Rüegg	Postdoktorstipend	Preventing Frailty after Cancer in Childhood through Understanding the Role of Physical Activity Patterns	01.02.2024	3 år/100 %	1 294 000
Heidi Lyng	Postdoktorstipend	Uncovering metastatic disease in prostate cancer patients by spatial genomics and medical imaging	01.07.2024	3 år/100 %	647 000
Håvard Takle Lindholm	Postdoktorstipend	Endogenous double stranded RNA as a driver of inflammation in ulcerative colitis	01.12.2024	3 år/100 %	110 000
Johanne Egge Rinholm	Postdoktorstipend	Lactate stimulation of transplanted brain organoids to improve recovery after stroke	01.01.2024	3 år/100 %	1 294 000

Oslo universitetssykehus HF

Søker	Søknadstype	Prosjekttittel	Oppstartsdato	Varighet	Beløp for 2024
John Anker Henrik Zwart	Postdoktorstipend	ZAMBA - Zoledronic Acid for Modic Back Pain	01.01.2024	6 år/50 %	647 000
Kristian Bernhard Nilsen	Postdoktorstipend	Improved diagnostics for nerve entrapments using machine learning: The ENTRAPME project	01.01.2024	3 år/100 %	1 294 000
Maria Skytjoti	Postdoktorstipend	Cerebral blood flow monitoring in healthy subjects and surgical patients; association with postoperative cognitive impairment	01.01.2024	3 år/100 %	1 294 000
Sindre Lee-Ødegård	Postdoktorstipend	Cysteine-lowering treatment with mesna against obesity and comorbidities (CYLOB)	01.01.2024	3 år/100 %	1 294 000
Synne Øien Blixt Stensland	Postdoktorstipend	Pathways After Trauma for Health and Well-being Among Young people in Services - PATHWAYS	01.01.2024	3 år/100 %	1 294 000
Therese Sørli	Postdoktorstipend	Busy Bs: The role of B-cells in breast tumor invasion	01.01.2024	3 år/100 %	1 294 000
Trine Vik Lagerberg	Postdoktorstipend	The PEDAL intervention: Reducing affective lability in bipolar disorder - a randomised controlled trial	01.01.2024	3 år/100 %	1 294 000
William Edward Louch	Postdoktorstipend	A Mother's Heart - Subcellular Changes During Healthy and Pathological Pregnancy	01.01.2024	3 år/100 %	1 294 000
Angelina Maniaol	Åpen prosjektstøtte	The ILB® trial: A phase II randomised controlled trial to investigate the effects of ILB® treatment in Amyotrophic Lateral Sclerosis	01.01.2024	3 år/100 %	3 000 000
Anna-Birgitte Aga	Åpen prosjektstøtte	Moving towards evidence-based treatment strategies for children with juvenile idiopathic arthritis in sustained remission: The MOVE-JIA randomized controlled trial	01.01.2024	3 år/100 %	3 000 000
Anne Cathrine Staff	Åpen prosjektstøtte	MumCare CVC: Mum's CardioVascular health Competence for life- Improving cardiovascular health and competence from an early age; an eHealth RCT	01.01.2024	3 år/100 %	2 990 000
Anne Gjøen Simonsen	Åpen prosjektstøtte	Role of HIF1A-induced Mitophagy in the Warburg effect and Tumorigenesis (MitoSwitch)	01.01.2024	3 år/100 %	2 937 000
Anne Hege Nymoen Aamodt	Åpen prosjektstøtte	The Nordic Chronic Migraine Trial of CGRP monoclonal antibodies and onabotulinumtoxinA dual therapy – a randomized-controlled double-blind trial (NorMig)	15.08.2024	3 år/100 %	1 250 000
Anne Wæhre	Åpen prosjektstøtte	The Norwegian Trans Youth Register study (The NORTrans Y- REG study)	01.01.2024	3 år/100 %	1 915 000
Arne Vasli Lund Søråas	Åpen prosjektstøtte	Cognitive function before and after COVID in a large prospective cohort	01.07.2024	3 år/100 %	1 448 000
Bente Evy Halvorsen	Åpen prosjektstøtte	Dissecting Neuroinflammation in Myocardial Infarction – new path in precision medicine in women	01.01.2024	3 år/100 %	3 000 000

Oslo universitetssykehus HF

Søker	Søknadstype	Prosjekttittel	Oppstartsdato	Varighet	Beløp for 2024
Bjørn Erik Neerland	Åpen prosjektstøtte	Frailty, delirium, biomarkers, and dementia risk; a large, population-based study	01.01.2024	3 år/100 %	2 948 000
Eivind Westrum Aabel	Åpen prosjektstøtte	Flecainide in arrhythmic mitral valve prolapse - an investigator-initiated randomized controlled trial (FLECAPRO)	01.01.2024	3 år/100 %	2 991 000
Elisabeth Gulowsen Celius	Åpen prosjektstøtte	AGE-MS - exploring ageing in multiple sclerosis	01.01.2024	3 år/100 %	2 896 000
Guro Elisabeth Lind	Åpen prosjektstøtte	Liquid Biopsy Analyses in Cancer Management: - Turning Challenges into Breakthroughs	01.01.2024	3 år/100 %	2 999 000
Harald Alfred Stenmark	Åpen prosjektstøtte	Lysosomes in cancer medicine	01.01.2024	3 år/100 %	3 000 000
Håvard Emil Greger Danielsen	Åpen prosjektstøtte	Deep learning for risk stratification and identification of prognostic features in patients with colorectal metastases	01.07.2024	3 år/100 %	958 000
Jan Terje Andersen	Åpen prosjektstøtte	Tailored design of a new generation of biologics	01.01.2024	3 år/100 %	2 968 000
Karl-Johan Malmberg	Åpen prosjektstøtte	Cell therapy against high-risk myeloid diseases with adaptive NK cells	01.01.2024	3 år/100 %	2 489 000
Kirsten Jane Skarstad	Åpen prosjektstøtte	Treatment of extreme antibiotic resistant infections using traditional antibiotics and composite synthetic antimicrobial peptides	01.01.2024	3 år/100 %	2 988 000
Kjell Heuser	Åpen prosjektstøtte	Astrocyte-driven brain hyperexcitability as novel treatment target for epilepsy	01.01.2024	3 år/100 %	2 191 000
Marie Eikemo	Åpen prosjektstøtte	Understanding the role of endocannabinoids in resilience to stress: Mechanistic and clinical investigations	01.08.2024	3 år/100 %	1 204 000
Marte Lie Høivik	Åpen prosjektstøtte	Lipidomics in inflammatory bowel disease (IBD) – developing novel custom-made assays for improved diagnostics and prognostics	01.01.2024	3 år/100 %	2 319 000
Nikolai Engedal	Åpen prosjektstøtte	AUTOcope - Autophagy in tumor-stroma metabolic rewiring and coping with microenvironment stress	01.01.2024	3 år/100 %	3 000 000
Sébastien Wälchli	Åpen prosjektstøtte	Safety-Enhanced Chimeric Antigen Receptors (SECAR)	01.01.2024	3 år/100 %	2 888 000

Sykehuset i Vestfold HF

Søker	Søknadstype	Prosjekttittel	Oppstartsdato	Varighet	Beløp for 2024
Asgeir Johannessen	Doktorgradsstipend	Chronic hepatitis B: improving care and scaling up treatment in sub-Saharan Africa	01.01.2024	3 år/100 %	1 294 000

Sykehuset Østfold HF

Søker	Søknadstype	Prosjekttittel	Oppstartsdato	Varighet	Beløp for 2024
Waleed Ghanima	Doktorgradsstipend	Evaluating a new diagnostic strategy for suspected DVT consisting of AI-based prediction model and point of care D-dimer and compression ultrasonography	01.01.2024	3 år/100 %	1 294 000

Sørlandet sykehus HF

Søker	Søknadstype	Prosjekttittel	Oppstartsdato	Varighet	Beløp for 2024
Tor Erik Nysæter	Doktorgradsstipend	Improving treatment through better assessment - Eight-year Follow-up of the Norwegian Study of the DSM-5 Alternative Model for Personality Disorders	01.01.2024	6 år/50 %	647 000
Øyvind Holme	Doktorgradsstipend	Mortality, cancer risk and the potential of advanced imaging in Polymyalgia Rheumatica	01.01.2024	3 år/100 %	1 294 000
Åshild Tellefsen Håland	Doktorgradsstipend	Digital and school-based Cognitive Behavioral Therapy (CBT) for youth anxiety: a randomized controlled trial.	01.01.2024	3 år/100 %	1 294 000

Vestre Viken HF

Søker	Søknadstype	Prosjekttittel	Oppstartsdato	Varighet	Beløp for 2024
Stina Therese Sollid	Doktorgradsstipend	User-controlled remote monitoring in patients with type 1 diabetes; effects on metabolic control, health-care utilization, distress and self-care behavior	01.01.2024	3 år/100 %	1 294 000

Diakonhjemmet Sykehus AS

Søker	Søknadstype	Prosjekttittel	Oppstartsdato	Varighet	Beløp for 2024
Karen Minde Fagerli	Doktorgradsstipend	Magnetic Resonance Imaging Assessment in Psoriatic Arthritis	01.10.2024	6 år/50 %	647 000
Lena Bugge Nordberg	Doktorgradsstipend	Addressing unmet needs in rheumatoid arthritis-interstitial lung disease	01.01.2024	3 år/100 %	1 294 000
Nina Paulshus Sundlisæter	Postdoktorstipend	Long-term treatment of rheumatoid arthritis in a new era	01.01.2024	3 år/100 %	1 294 000
Laura Anne Wortinger Bakke	Åpen prosjektstøtte	PlacMENT: Impact of Pregnancy and Birth Complications and Placental Genomics on Maternal and Child Mental Health	01.01.2024	3 år/100 %	2 321 000

Lovisenberg Diakonale Sykehus AS

Søker	Søknadstype	Prosjekttittel	Oppstartsdato	Varighet	Beløp for 2024
Alexandra Havdahl	Doktorgradsstipend	The co-occurrence and shared genetics between Neurodevelopmental conditions And Neurodegenerative disOrders (NANO)	01.01.2024	3 år/100 %	1 294 000
Robyn Wootton	Postdoktorstipend	Gaining insights into immunological processes implicated in neurodevelopmental conditions using autoimmune conditions as blueprints (The Blueprint Project)	01.01.2024	3 år/100 %	1 294 000
Asbjørn Christophersen	Åpen prosjektstøtte	Discovering disease drivers for better treatment of rheumatoid arthritis: The RA-Drive Study	01.01.2024	3 år/100 %	2 932 000
